The Power of Tax Deferral allows annuities to grow much faster than alternative vehicles because you:

- Earn interest on your principal.
- Earn interest on your interest.
- Earn interest on money you normally pay in taxes.
- Never pay tax on interest until you take it out.
- Decide on the best time to withdraw your money.

Annuities allow you to defer taxation on the growth during your higher-earning years, then liquidate later during your retirement years when you are likely at a lower tax bracket.

No Front-End Charges or Annual Fees

- 100% of your money is working for you from day one!

Waiver of Surrender Charges Included

Surrender charges are waived if the annuitant becomes confined to a nursing home or is diagnosed by a physician with a life expectancy of 12 months or less. Maximum surrender-free withdrawal amount available under the rider is \$50,000 per year or \$200,000 in a lifetime. This feature is not available in California.

Surrender charges are also waived in the event of annuitant's death.

You choose the product and time frame that works best for your plans and goals. The company guarantees a crediting rate for that chosen period. Your money is safe from market fluctuations, which helps to foster financial peace of mind.

After the guarantee period is over, you can renew for another term, leave it sit as liquid funds earning the company portfolio rate, or create an ongoing income stream for retirement. Choices and timing are up to you.

Withdrawals are subject to income taxation for the tax year that the withdrawals are made. If withdrawals are made prior to age 59 1/2, they may also be subject to an IRS penalty. If you have Qualified funds, the IRS does enforce Required Minimum Distributions beginning at age 72.

*Guarantee contingent on maintaining minimum contract values.

**The MVA is an adjustment to the amount withdrawn, which could be negative or positive for the policyholder. The MVA amount is based on the difference between the treasury interest rates at the time of withdrawal and at issue. If rates have increased since issue, a positive MVA is created and will decrease the amount being surrendered. If interest rates go down, a negative MVA is created and will increase the amount being surrendered. Even with an MVA, in no event will the cash value of the policy be less than the Guaranteed Minimum Cash Surrender Value (87.5% of the single premium for the policy, minus withdrawals/surrenders, accumulated at the Basic Interest Rate).

Benefits are only generally described here. Product and rider availability may vary by state. Read the policy for exact details on benefits and exclusions. If there is a discrepancy between the product as described here and the policy issued to you, the provisions of the policy will prevail.
