It Is Time to Protect What You Have Worked So Hard to Build

Whether it is for retirement, legacy, or lifestyle, you have worked hard to earn a living and build your wealth. You have pushed through the daily grind for decades and have finally arrived at a new chapter in life. And while it may be time to start thinking about retirement income and protecting your wealth from unnecessary risk, it does not mean that your wealth needs to stop working for you. You deserve the best, and that means a retirement solution that can offer a total-package of leading accumulation benefits that you can trust and rely on.

The Accumulation Protector PlusSM Annuity (APP) is a fixed indexed annuity designed to both accumulate wealth, and protect it against future market downturns. The APP annuity has a proven track record of performance and reliability that set it apart, and offers **performance you can count on** through its 10-year guarantees*, market leading rates, and flexible crediting strategies.

With the **Accumulation Protector PlusSM** Annuity, you can let your money do the hard work for you, and have the peace-of-mind knowing that your wealth is protected for what you have in store.

What is a Fixed Indexed Annuity?

A Fixed Indexed Annuity is a tax-deferred, stable, financial option designed to grow your premium and protect it if the market drops. This product is typically accompanied with multiple crediting strategies that you can choose to participate in. These crediting strategies include at least one indexed account and may also include a Fixed Rate account, as seen with the **Accumulation Protector PlusSM** Annuity. When you select an indexing strategy, you are credited interest at the end of the crediting period in the event the index value grows.

A Fixed Indexed Annuity offers access to more interest growth potential as the market performs positively. In addition to growth potential, a Fixed Indexed Annuity offers protection of principal in several different ways. You do not lose money, including interest earned during previous crediting periods, if the index value drops because your money is allocated to the annuity itself rather than directly to the index (or indices). Additionally, the indexed accounts typically offer a minimum guaranteed interest rate of at least 0%.

*The Participation Rates for the Momentum Index One-year point-to-point and Two-year point-to-point crediting strategies are guaranteed for 10 years from the annuity issue date, provided that Sentinel Security Life Insurance Company continues to have access to the Momentum Index. The Participation Rates for the CS ESG Macro 5 Index One-year point-to-point and Two-year point-to-point crediting strategies are guaranteed for 10 years from the annuity issue date, provided that Sentinel Security Life Insurance Company continues to have access to the CS ESG Macro 5 Index.

Performance You can Count On

Protect Your Principal

Protection is the cornerstone of the **Accumulation Protector PlusSM** Annuity. Whether the market goes up, down, or remains the same, your principal is guaranteed not to decrease* due to market performance and is protected through the APP's Fixed and Indexed Accounts.

Accumulate Wealth

The APP gives you exclusive access to the **Momentum Index** and the **CS ESG Macro 5 Index**, while also offering strategies linked to the well-established **Standard and Poor's Composite Stock Price Index** ("S&P 500[®]" Index), and a Fixed Account that provides a guaranteed rate of return. The Momentum Index, the CS ESG Macro 5 Index, S&P 500[®] Index and the Fixed Account provide opportunities to accumulate wealth over time.

Choose from Flexible Crediting Strategies

Not everyone has the same financial goals, nor the same time horizon for achieving those goals. It is because of these different objectives that Flexibility is another key component of the **Accumulation Protector PlusSM** Annuity. This annuity offers a diversified set of fixed and indexed crediting strategies with 1, 2 or 3 year periods that allow you and your advisor to choose the accounts and periods that most align with your goals. Additionally, you can adjust the allocations on the contract anniversary, coinciding with the end of the crediting period, to continue to meet your changing needs.

Preserve Your Lifestyle

Achieve greater financial confidence and achieve the goals you have set for your lifestyle, retirement income and legacy by taking advantage of the flexible options provided by the **Accumulation Protector PlusSM** Annuity. These strategies were created to help protect what you have worked hard for and provide opportunities to accumulate wealth, so you can rest easy in retirement knowing you are preserving the legacy you have built.

*If Rate Enhancement Rider is purchased, principal will not decrease due to market performance but could decrease due to the rider fee.

Key Features

10 Year Guarantees

The participation rates of the Momentum Index and CS ESG Macro 5 Index 1- and 2-year point-to-point strategies are guaranteed for 10 years from the annuity issue date and are available for 10 years regardless of how much is allocated to those strategies at issue.*

Premium Bonus

When you purchase the **Accumulation Protector PlusSM** Annuity you will receive a one-time premium bonus of 10%. The premium bonus is immediately credited to your account, increasing the value of your account and giving you the opportunity to earn additional interest. Your funds can be accessed subject to your vesting schedule.

Contract Year	1	2	3	4	5	6	7	8	9	10	11+
Vesting	0%	10%	20%	30%	40%	50%	60%	70%	80%	90%	100%

Flexible Crediting Strategies

You have the flexibility to choose how your single premium is allocated across eleven crediting strategies. These crediting strategies include a Fixed Account and ten **Indexed Accounts** linked to three indices, the **Momentum Index**, the **CS ESG Macro 5 Index**, and the **S&P 500[®] Index**. We know that your life and needs are ever evolving, and that is why you can adjust your allocations on the contract anniversary coinciding with the end of each strategy's crediting period. At that time, you may allocate to any available strategy for a new crediting period of one, two or three years.

Fixed Rate Option

Speaking of performance you can count on, the premium allocated to the Fixed Rate Account will earn daily interest at a specified rate, which is guaranteed for the ensuing contract year. You will receive this rate **no matter how the market performs**.

Trigger Rate Option

The APP annuity's Trigger Rate may be a good alternative if you are considering Fixed Rate allocations. **How does the Trigger Rate work?** If the Momentum Index earns 0% or more then the premium allocated to the Trigger Rate account will earn interest at a specified rate. So the benefit to the Trigger Rate is that you receive a higher rate when compared to the fixed account as long as the Momentum Index breaks even or earns a positive return.

Rate Enhancement Rider

The Rate Enhancement Rider is a great feature to consider if you want to take your accumulation power to the next level!

First, this rider increases the amount available for free withdrawal from 5% to 10% of your annuity's Account Value.

Additionally, this rider gives you a better opportunity to earn more interest as it increases the Fixed, Participation, and Cap rates across your annuity's crediting strategies. Increasing the Participation and Cap Rates offers potential to substantially benefit from the index's upside, because your premium has access to a larger percentage of an index's growth.

There is a fee with the purchase of the rider.

Pricing Guarantee

The **Accumulation Protector PlusSM** Annuity offers a 110% Return of Premium (ROP) Guarantee if the Rate Enhancement Rider is purchased and the contract persists to year 10. The premium is adjusted for withdrawals.

* The Participation Rates for the Momentum Index One-year point-to-point and Two-year point-to-point crediting strategies are guaranteed for 10 years from the annuity issue date, provided that Sentinel Security Life Insurance Company continues to have access to the Momentum Index. The Participation Rates for the CS ESG Macro 5 Index One-year point-to-point and Two-year point-to-point crediting strategies are guaranteed for 10 years from the annuity issue date, provided that Sentinel Security Life Insurance Company continues to have access to the CS ESG Macro 5 Index.

Choose from Eleven Growth Strategies

You have the flexibility to choose how your single premium is allocated across eleven crediting strategies. These crediting strategies include a **Fixed Account** and ten **Indexed Accounts** linked to three indices, the **Momentum Index**, the **CS ESG Macro 5 Index**, and the **S&P 500® Index**. We know that your life and needs are ever evolving, and that is why you can adjust your allocations on the contract anniversary coinciding with the end of each strategy's crediting period. At that time, you may allocate to any available strategy for a new crediting period of one, two or three years.

The crediting periods for the **Accumulation Protector PlusSM** Annuity's crediting strategies range from one, two, or three years. The crediting strategies include a **Fixed Rate account**, **Trigger Rate account**, and several **Point-to-Point with Participation Rate or Cap Rate accounts**. A **Point-to-Point** strategy measures the difference in the index's value on each contract anniversary, comparing it to the value of the index either a year earlier, two years earlier, or three years earlier, depending on the option you choose.

CREDITING STRATEGY OPTIONS		DESCRIPTION
Momentum Indexed Accounts	One-year point-to-point crediting period with <i>Participation Rate</i>	You can allocate to three different Momentum Indexed accounts with a Participation Rate . The Participation Rate allows you to access a percentage of the index's growth for a specific crediting period.
	Two-year point-to-point crediting period with <i>Participation Rate</i>	With the Participation Rate, if the index does not perform positively, your Account does not lose value.
	Three-year point-to-point crediting period with <i>Participation Rate</i>	The Participation Rates for the Momentum Index One-year point-to-point and Two-year point-to-point crediting strategies are guaranteed for 10 years from the annuity issue date.*
	One-year crediting period with <i>Trigger Rate</i>	You can also allocate to a Momentum Indexed account with a Trigger Rate . The premium allocated to the Trigger Rate Account will earn interest at a specified rate if the market performs positively or breaks-even. The Participation Rate allows you to access a percentage of the index's growth for the crediting period.
	One-year point-to-point crediting period with <i>Cap Rate</i>	The Cap Rate has a set maximum amount of interest that can be credited at the end of the crediting period. <ul style="list-style-type: none"> If the index value increases but the growth is less than the Cap Rate, your credited interest is the same as the index's percentage increase. If the index value increases and the growth is greater than the Cap Rate, your credited interest is the same as the Cap Rate.
	Two-year point-to-point crediting period with <i>Participation Rate</i>	With both the Participation Rate and Cap Rate, if the index does not perform positively, your Account does not lose value.
Fixed Rate Account	One-year crediting period with a <i>Fixed Interest Rate</i>	The premium allocated to the Fixed Rate Account will earn daily interest at a specified rate, which is guaranteed for the ensuing contract year. You will receive this rate no matter how the market performs.

*The Participation Rates for the Momentum Index One-year point-to-point and Two-year point-to-point crediting strategies are guaranteed for 10 years from the annuity issue date, provided that Sentinel Security Life Insurance Company continues to have access to the Momentum Index.

**The Participation Rates for the CS ESG Macro 5 Index One-year point-to-point and Two-year point-to-point crediting strategies are guaranteed for 10 years from the annuity issue date, provided that Sentinel Security Life Insurance Company continues to have access to the CS ESG Macro 5 Index.

Indices at a Glance

The **Accumulation Protector PlusSM** Annuity offers great earnings potential in any type of market through its access to exclusive and reputable indices. These indices offer stable, risk-controlled ways to potentially accumulate value through the indices' possible growth. The three indices linked to the Indexed accounts include the S&P 500[®] Index, the Momentum Index, and the CS ESG Macro 5 Index.

S&P 500[®] Index

The **S&P 500[®]** Index measures the stock performance of the 500 largest publicly traded companies in the U.S. These companies represent leading industries of the U.S. economy.

Momentum Index

The **Momentum Index** is a **global multi-asset** index that dynamically allocates across its components using a unique and flexible **momentum-driven** strategy with **risk-adjusted weightings**. The Momentum Index was designed to adapt to various market conditions and generate consistent returns over time.

The risk-monitored Momentum Index can create value for your annuity in all market types (rising, falling, or remaining the same) by taking long positions (buying) in components exhibiting the strongest trends and short positions (selling) in components with weaker trends.

Access to the Momentum Index is exclusive to buyers of the **Accumulation Protector PlusSM** Annuity.

The index has a 3-step rebalancing process built upon key financial concepts.

Step 1
MOMENTUM

Each month, two different mechanisms are implemented:

- The exposure to the components is adjusted based on a momentum strategy ("Momentum")
- Weights are allocated to each component based on their volatility ("Risk-Adjusted Weights")

Step 2
RISK ADJUSTED WEIGHTS

Each day, a further mechanism is implemented:

- The Index is monitored with the goal of maintaining volatility near 5%

Step 3
RISK CONTROL

**To learn more about this index,
please read the Momentum Index brochure.**

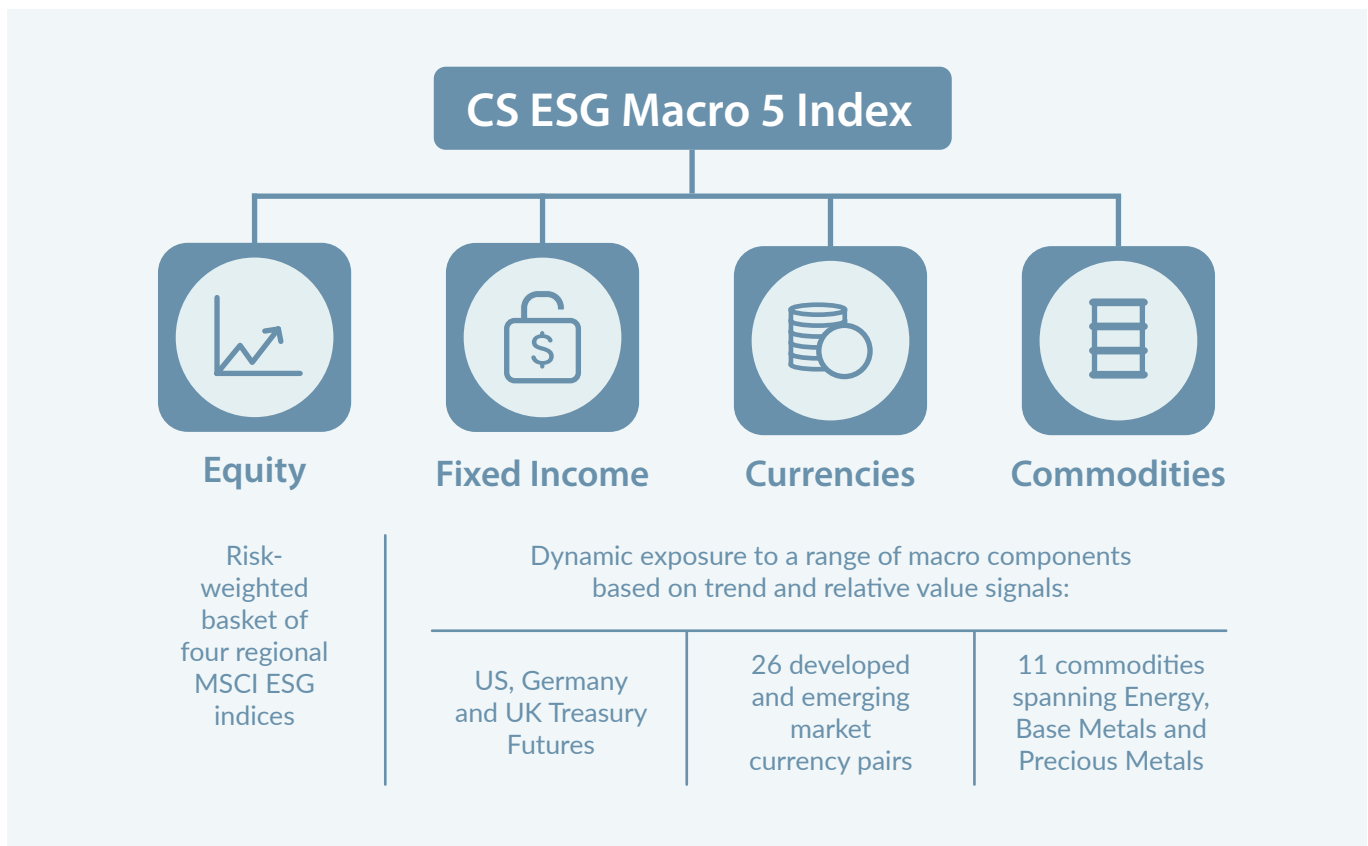

CS ESG Macro 5 Index

The **CS ESG Macro 5 Index**, a **global multi-asset index**, applies an **innovative** strategy that combines **environment, social and governance (ESG) equity components** with **macro components**, while a risk control mechanism **targets a 5% index** volatility. The CS ESG Macro 5 Index uses a daily adjustment aimed at stabilizing performance and generating consistent returns over time.

With the ESG component, your annuity has exposure to a risk-weighted basket of **four MSCI ESG Indices** that focus on regional activities considered positive for the environment, society, that are not subject to controversy and that display the highest ESG scores as computed by MSCI.

The framework of the CS ESG Macro 5 Index uses diversification as an approach to create value for your annuity by seeking returns across various market environments while mitigating risk exposure.

Access to the CS ESG Macro 5 Index is exclusive to buyers of the **Accumulation Protector PlusSM** Annuity.

Momentum Index 1-Year Participation (Hypothetical Data)

This scenario is based on a \$100,000 initial purchase premium and the selection of the Rate Enhancement Rider with 100% of the premium allocated to the Momentum Index 1yr Participation Rate strategy. This example reflects the Momentum Index values from 5/1/2014-5/1/2024 with a 10% Premium Bonus (The Momentum Index and its predecessor the Credit Suisse Momentum Index were not in existence prior to 2/12/2020. Prior Index data has been simulated.), 210% participation rate on the Momentum Index 1yr Participation Rate strategy, and a 260% participation rate on the Momentum Index 1yr Participation Rate strategy with the Rate Enhancement Rider. This example is hypothetical only and is meant for illustration purposes. It is not a prediction of future results. This product was not available prior to August 2020. Past performance is no indication or guarantee of future performance. The Index data has been derived by means of a retroactive application of a back-casted model designed with the benefit of hindsight. The back-casted, hypothetical, historical Index data this chart is based on has inherent limitations. No representation is made that in the future the Index will have the returns used. Alternative modeling techniques or assumptions might produce significantly different results and may prove to be more appropriate. The Index is calculated net a 0.5% p.a. index calculation fee. The Index also contains embedded transaction costs and holding costs. The Index could underperform relative to other indices, including equity indices. In addition, the Index is an excess return index: it reflects the return of components net of the cost of funding a hypothetical investment in them.

Additional Product Features

Issue Ages: 0-85

Contract Term: 10 years

Minimum Single Premium: \$5,000

Maximum Single Premium: \$1,000,000 (without prior approval)

Maturity Age: 100

Acceptable Funds: Both non-qualified and qualified markets

Free Withdrawals

Certain life events may arise where you need to access your money sooner than you were expecting. With the **Accumulation Protector PlusSM** Annuity, there are several ways to access your funds if the unexpected occurs.

Some annuities do not offer free early withdrawals, but in the second contract year, the **Accumulation Protector PlusSM** Annuity allows you to withdraw up to 5% of your Account Value or your Required Minimum Distribution, whichever greater.

Terminal Illness and Nursing Home Waiver

If you are diagnosed with a terminal illness or need to move into a nursing home, you can make a full surrender or partial withdrawal with no Market Value Adjustment, Surrender Charge, or loss of any applicable Non-Vested Premium Bonus under certain conditions.

Surrender Charges

If you surrender your contract or request withdrawals above the free withdrawal amount, there may be surrender charges. Please discuss the surrender charge schedule with your agent.

Contract Year	1	2	3	4	5	6	7	8	9	10	11+
10 year	10%	9%	8%	7%	6%	5%	4%	3%	2%	1%	0%

Settlement Options

You may choose, after the fifth contract year or at death, when you want to start to receive annuity payments and the duration in which they are paid. The vested value and the settlement option you select will determine the payment amount.

Lifetime Income Only

With this option, the annuitant receives equal monthly payments for the rest of their lifetime. Payments will end with the payment due just before the annuitant's death. No death benefit is payable with this option.

Period Certain Only

This settlement option guarantees equal monthly payments for a specified period, between 10 years and 20 years. After the fifth contract year, you may request a specific period, with guaranteed equal monthly payments, between 5 years and 20 years. If the annuitant dies before payments have been made for the specified period, the beneficiary will receive remaining payments for the specified period.

Lifetime Income with Guaranteed Period Certain

This settlement option provides equal monthly payments for the greater of the annuitant's remaining lifetime or a specified period of time. If the annuitant dies after payments have been made for the specified period, payments end with the payment due just before the annuitant's death.

Death Benefit

Protect your loved ones with the APP's Death Benefit feature. If you pass away before receiving any proceeds*, other than a Withdrawal, the amount payable to your beneficiary(ies) is equal to the greater of the Account Value less any Non-Vested Premium Bonus or the Minimum Guaranteed Surrender Value determined as of the date of death.

* Proceeds are defined as the amount payable when: (1) the Owner takes a Withdrawal; (2) the Owner surrenders their Contract; (3) an Owner dies; or (4) the Contract matures.

Disclosures

Annuity Guarantees - Annuity guarantees rely on the financial strength and claims-paying ability of Sentinel Security Life Insurance Company. Additionally, the Participation Rates for the Momentum Index One-year point-to-point and Two-year point-to-point crediting strategies are guaranteed for 10 years from the annuity issue date, provided that Sentinel Security Life Insurance Company continues to have access to the Momentum Index.

The Participation Rates for the CS ESG Macro 5 Index One-year point-to-point and Two-year point-to-point crediting strategies are guaranteed for 10 years from the annuity issue date, provided that Sentinel Security Life Insurance Company continues to have access to the CS ESG Macro 5 Index.

Fixed Account - If you select the Fixed Account, this account will earn the current fixed interest rate which is guaranteed for each Contract Year and credited daily.

Index Account Interest Rate Calculation - At the end of each crediting period, the index value (ending value) is compared to the index value at the beginning of each crediting period (beginning value). When the ending value is higher than the beginning value, interest is credited to the index account. When the ending value is lower than the beginning value, no interest will be credited.

Index Crediting Strategies - Value in the index strategies will grow if the applicable index increases. Your potential earnings are either capped at a maximum interest rate or limited by a certain percentage of the index gain, depending on the terms and conditions of your index strategy. S&P 500® cap and participation rates, and Trigger Rates are subject to change after the first crediting period.

Cap - If you select an index account utilizing a cap, the maximum index interest rate for the crediting period may not be more than the cap.

Participation Rate - If you select an index account utilizing a participation rate, the interest rate is equal to the percentage increase in the index value over the crediting period multiplied by the participation rate.

Trigger Rate - The minimum percentage of change in the Momentum Index required to receive the Trigger Account Interest Rate.

Penalty Free Withdrawal - Up to the greater of 5% of the Accumulation Value or the Required Minimum Distribution may be withdrawn without any Surrender Charges, forfeiture of Nonvested Bonus, or Market Value Adjustment starting in year two.

Nursing Home Waiver - Must be confined to a nursing home for a period of at least 90 consecutive days. There is a waiting period of one year. If the owner is confined to a nursing home during the waiting period, this benefit would not be available in certain states.

Terminal Illness Waiver - Terminal illness is defined as any medical condition which a physician certifies that the contract owner's expected life span is twelve months or less. Proof of the terminal illness is required by a certified licensed physician that is not the owner, annuitant, or a family member to the owner or annuitant. The owner cannot be terminally ill during the waiting period. There is a waiting period of one year.

Vested Value - The Accumulation Value less the amount of Premium Bonus that is not vested using the following Vesting Schedule:

Contract Year	1	2	3	4	5	6	7	8	9	10	11+
Vesting	0%	10%	20%	30%	40%	50%	60%	70%	80%	90%	100%

Market Value Adjustments - The Market Value Adjustment (MVA) is specified in the contract. The MVA expires at the end of the Surrender Charge Period.

Surrender Value - The Surrender Value is subject to Surrender Charges, Market Value Adjustment (MVA), forfeiture of Non-vested Premium Bonus, and Minimum Guarantee Surrender Value required by Standard Non-Forfeiture Law. Surrender Charges are calculated according to the following schedule:

Contract Year	1	2	3	4	5	6	7	8	9	10	11+
10 year	10%	9%	8%	7%	6%	5%	4%	3%	2%	1%	0%

Federal Income Tax Penalty - Any distribution taken prior to any owner's age 59 1/2 may be subject to an additional 10% federal income tax penalty.

Settlement Options - Lifetime Income Only and Lifetime Income with Guarantee Period Certain payments are calculated utilizing the Annuity 2012 IAR table and calculated at a 1% interest rate.

Rate Enhancement Rider - Provides higher interest rates, caps, and participation rates. Also includes the ROP benefit and penalty free increase.

Rider Fees - If you elect the Rate Enhancement Rider, there is an annual fee on each contract anniversary of 0.95% multiplied by the value in each crediting account and subtracted from the corresponding crediting account.

Death Benefit - The total Death Benefit that would be payable to the beneficiary when the Owner or the Annuitant, if the Owner is not a natural person, dies before annuity payments begin. The Death Benefit is the greater of the Vested Value or the Minimum Guaranteed Surrender Value on the date of the Owner's death.

Minimum Guaranteed Surrender Value - (1) 87.5% of Purchase Premium; less (2) Any Withdrawal amount including any applicable Market Value Adjustment and Surrender/Withdrawal Charges; plus (3) interest credited at the Minimum Guaranteed Surrender Value Interest Rate shown on the Contract Data Page from date Purchase Premium is received and accepted by Sentinel Security Life Insurance Company and will in no event be less than the present value, at time of surrender, of the Accumulation Value then guaranteed on the later of the 10th Contract Anniversary or the anniversary next following the Owner's 70th birthday. The present value will be calculated on the basis of an interest rate 1% higher than the interest rate which was used to accumulate the Accumulation Value from the date of Surrender to the later of the 10th Contract Anniversary or the anniversary next following the Owner's 70th birthday. The paid-up annuity, Cash Surrender Values and Death Benefit available under this Contract are not less than the minimum benefits required by the NAIC Standard Nonforfeiture Law for Individual Deferred Annuities, model #805. A detailed description of the method by which these values are computed has been filed with the Interstate Insurance Product Regulation Commission (IIPRC).

The CS ESG Macro 5 Index and any trademarks, service marks and logos related thereto are service marks of Credit Suisse Group AG, Credit Suisse International, or one of their affiliates (collectively, “**CS**”). Each of The Momentum Index and CS ESG Macro 5 Index is referenced as the “**Index**” and collectively “**the Indices**”. Solactive and CS have no relationship to the Sentinel Security Life Insurance Company, other than the licensing of the relevant Index and its service marks for use in connection with the Accumulation Protector PlusSM Annuity and is not a party to any transaction contemplated hereby.

The rules of the Index may be amended by Solactive or CS as applicable. An amendment to the rules may result from, without limitation, a change to the construction or calculation rules for the Index or from Solactive or CS determining that a change to the rules is required or desirable to update them or to address an error, omission, or ambiguity. No assurance can be given that any such amendment would not affect parties to this document.

The Indices contain embedded transaction costs and holding costs. The Indices are excess return indices, which means that they reflect the return of components net of the cost of funding a hypothetical investment in them. The Index returns are likely to be negatively affected by such costs of funding. The Indices have a 0.5% per annum embedded fee deducted daily. The index fees will place a drag on the performance of the Indices, offsetting any appreciation of its portfolio, exacerbating any depreciation of its portfolio, and causing the level of the Indices to decline steadily if the value of its portfolio remains relatively constant.

While volatility controls may result in less fluctuation in rates of return as compared to indices without volatility controls, they may also reduce the overall rate of return as compared to products not subject to volatility controls.

The end-of-day value of the Indices are published subject to the provisions in the rules of the Index. Solactive and CS are not obliged to publish any information regarding the Indices other than as stipulated in the rules of the Index.

The Index is the exclusive property of and currently sponsored by Solactive or CS, as applicable.

The Accumulation Protector PlusSM Annuity is not in any way sponsored, endorsed, or promoted by Solactive or CS. Solactive and CS have no obligation to take the needs of any person into consideration in composing, determining, or calculating the Indices (or causing the Indices to be calculated). In addition, Solactive and CS make no warranty or representation whatsoever, express or implied, as to the results to be obtained from the use of the Index and/or the level at which the Index stands at any particular time on any particular day or otherwise, the quality, accuracy and/or completeness of the Index, or the advisability of or results to be obtained by using, investing in, or trading the Accumulation Protector PlusSM Annuity, and Solactive and CS shall not be liable, whether in negligence or otherwise, to any person for any errors or omissions in the Indices or in the calculation of the Indices, any delayed or interrupted publication with respect to the Indices, or under any obligation to advise any person of any errors or omissions therein. The Index is compiled, maintained, and calculated by Solactive or CS, as applicable. However, Solactive and CS shall not be liable for the results obtained by using, investing in, or trading the Accumulation Protector PlusSM Annuity.

Solactive and CS have not created, published, or approved this document and accept no responsibility or liability for its contents or use. Obligations to make payments under the Accumulation Protector PlusSM Annuity are solely the obligation of Sentinel Security Life Insurance Company.

There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of “ESG” (Environmental, Social, Governance). If not indicated otherwise, “ESG” is used interchangeably with the terms ‘sustainable’ and ‘sustainability’. Unless indicated otherwise, the views expressed herein are based on CS’ own assumptions and interpretation of ESG at the time of drafting. CS’ views on ESG may evolve over time and are subject to change.

Where an index is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g. not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.

An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same index can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Unless this has been explicitly communicated in the product or service documentation, no representation is given as to whether the product or service meets any specific regulatory framework or CS’ own criteria for internal sustainability frameworks.

SENTINEL SECURITY LIFE INSURANCE COMPANY

The Sentinel story started over 70 years ago in 1948. A group of passionate Utah funeral directors saw many families in need of an insurance product designed to help pay funeral costs. To help meet this need, they came together and created Sentinel Mutual Insurance Company. At last families were able to purchase a budget-friendly life insurance contract designed to help pay for the final expenses of a loved one.

As the years went by a few name changes took place (going from Sentinel Mutual Insurance Company to Sentinel Insurance Company in 1954 to Sentinel Security Life Insurance Company in 1957).

In more recent years Sentinel decided to expand its product offerings beyond final expense. In 2009, the company rolled out a Medicare Supplement product to help pay for the gaps not covered by Medicare. This was followed by the development of multiple innovative annuity products (Personal Choice Annuity in 2011, Summit Bonus Index in 2013, Personal Choice Plus in 2017, and Guaranteed Income Annuity in 2018). With consistent and solid growth, Sentinel remains well-positioned to continue creating and rolling out new innovative products to better serve our client base.

We look back at our history of service with pride and excitement for the future. We invite you to become part of our story as we work to provide peace of mind to families throughout the country.
