

MARKETFORCE BONUS INDEX™ ANNUITY

**Fixed index annuity with enhanced growth potential — plus
downside protection**

**Rate buy-up accounts plus an 8% premium bonus offer a
springboard to help you achieve financial success in retirement.**

What if you could give your retirement strategy an immediate boost while avoiding market risk? With MarketForce Bonus Index by EquiTrust, you can.

MarketForce Bonus Index is designed to help you reach the retirement you deserve. As a rate buy-up fixed index annuity (FIA), it offers the benefits of an FIA — plus rate buy-up index accounts¹ that provide enhanced growth potential. You'll also receive an 8%² bonus on all premiums paid in the first year!

WHAT IS A FIXED INDEX ANNUITY?

An FIA is a product designed to provide you income for retirement through interest earned on market indices. Your money is never exposed to downside market risk. Your annuity value increases when the index goes up, but you won't lose money when the index goes down.¹

Growing your Accumulation Value

It starts by choosing your index accounts and crediting strategies, providing you the ability to diversify your retirement strategy. Then, on appropriate contract anniversaries, "index credits" are determined on these accounts and applied to your contract's current Accumulation Value.

If the index value increases, your Accumulation Value grows. If the index value declines, your Accumulation Value will simply remain unchanged from the previous period's Accumulation Value. Index credits will never be less than zero.¹

ENHANCE YOUR GROWTH POTENTIAL

MarketForce Bonus index gives you the option to allocate funds to rate buy-up index accounts. These accounts offer extra upside potential through enhanced cap and participation rates — in exchange for an annual fee.

ADVANTAGES OF MARKETFORCE BONUS INDEX

Your FIA contract is backed by the claims-paying ability of the insurance company, EquiTrust. MarketForce Bonus Index offers several important advantages:

Protection of your principal¹

Availability of rate buy-up accounts

Tax-deferred earnings

Withdrawal privileges⁴

Built-in guarantees³

8% premium bonus²

YOU CONTROL YOUR MONEY — COMING IN OR GOING OUT

MarketForce Bonus Index puts you in the driver's seat, with flexibility and options that give you control over your money.

Premiums and premium bonus

After your initial premium payment, you may add subsequent premiums during the first contract year. The 8% premium bonus² is added to your premium payments immediately, and is a permanent part of your Accumulation Value.

You then earn interest and index credits on the combined value of your premium and premium bonus. If you surrender your contract, a surrender charge and Market Value Adjustment (MVA)⁵ may be applied to the full Accumulation Value, but you won't lose your bonus. In the event of your death, 100% of your premium bonus is included in the death benefit.

You may allocate your premiums to the fixed rate account or index accounts.

Fixed rate account

- **1-Year Interest Account** — Interest rate is guaranteed for one contract year. May change subject to contractual Minimum Guaranteed Interest Rate on each contract anniversary. Subsequent premiums are applied to this account until contract anniversary, then allocated per instructions.

Index account options

A variety of index accounts offer earnings — called Index accounts — based on the changes of a specified index. Credits are never less than zero, and are added to accounts at the end of the one-year period. Cap, participation and trigger rates are reset annually. Three options are available:

- **1-Year Point-to-Point Cap** — Index credits are based on the percentage change in the underlying index from the previous contract anniversary, up to a specified cap.
- **1-Year Point-to-Point Participation** — Index credits are based on based on the percentage change in the underlying index from the previous contract anniversary, multiplied by the participation rate.
- **1-Year Point-to-Point Performance Trigger** — Index credits are based on the percentage change from the previous contract anniversary, with index credits based on a declared Performance Trigger Rate if index growth is positive. If the index decreases or has no growth, index credits are zero.

Rate buy-up accounts

Allocations directed to rate buy-up accounts offer the advantage of greater growth potential due to enhanced cap and participation rates. A 1.50% fee is deducted from the Accumulation Value at the beginning of each contract year, based only on the allocation to rate buy-up accounts. The initial charge occurs on the contract effective date, and the 1.50% annual fee will not change for the duration of the contract. If the index credits for a given contract year are less than the fee, the Accumulation Value allocated to the rate buy-up accounts may decrease.

About the indices

S&P 500 Index⁶

Visit spglobal.com/spdji

Ticker: SPX

Widely regarded as the best single gauge of large-cap U.S. equities. More than \$15.6 trillion is indexed or benchmarked to the S&P 500 Index, with indexed assets comprising approximately \$7.1 trillion of this total. Includes 500 leading companies and covers approximately 80% of available market capitalization.

S&P 500 Dynamic Intraday TCA Index⁶

Visit spglobal.com/spdji

Ticker: SPFDYNI

Seeks to provide exposure to the S&P 500 through the use of E-mini S&P 500 futures, while applying an intraday volatility control and trend-following mechanism. The index rebalances up to 13 times throughout the trading day, employing a time-weighted average price (TWAP) to adapt to changing market conditions as it seeks a more stable volatility experience compared to traditional risk control indices. Trend signals guide rebalancing to help the index respond to market movements while seeking to maintain a 15% volatility target to allow for higher potential S&P 500 exposure.

Barclays Focus50 Index⁷

Visit Indices.Barclays/Focus50

Ticker: BXIIF50E

Seeks growth opportunities while limiting volatility through exposure to a dynamic combination of U.S. stocks and U.S. Treasury Indices. Low-volatility U.S. stocks are used because, historically, they have tended to outperform other, higher volatility stocks on a risk-adjusted basis. The broad universe consists of all stocks listed on the NYSE and NASDAQ issued by companies headquartered in the U.S. The addition of Treasuries adds a diversification benefit and a potential reduction in risk. To further control risk, the index aims to limit its annual volatility to a 5% target using a process called volatility control.

S&P MARC 5% Excess Return Index⁶

Visit spglobal.com/spdji

Ticker: SPMARC5

Seeks to provide multi-asset diversification within a simple risk-weighting framework, tracking three underlying component indices that represent three asset classes: equities, commodities and fixed income. This index is dynamically rebalanced between the three indices and the cash component to target a 5% level of volatility. In low-volatility environments, the index risk-control mechanism increases market exposure to riskier assets by increasing the allocation to the index (up to a leveraged position of 150%).

EquiTrust is a name you can trust

At EquiTrust, we're committed to being a financial partner you can trust with your retirement dreams. Rest assured your annuity contract is backed by a company with conservative investment strategies, anchored by a disciplined and diversified management style. EquiTrust is supported by a history of success, experience and strength. Magic Johnson Enterprises — a diversified consortium of business entities and partnerships — owns a controlling interest in EquiTrust.

IMPORTANT FEATURES THAT OFFER PEACE OF MIND

Account transfers

On each contract anniversary, you may transfer money among the various accounts offered, including transfers between the non-fee and rate buy-up accounts.

Free withdrawals

You may withdraw up to 10% of the Accumulation Value each year after the first contract year without paying any charges.⁴

Lump-sum payment option

Your contract's cash surrender value is available as a lump sum at any time. Surrender charges are in effect during the first 10 contract years, are a percentage of the Accumulation Value, and decline annually: 16, 14.5, 13, 11.5, 9.5, 8, 6.5, 5, 3 and 1%.⁸

In addition, early surrenders or withdrawals over 10% may be subject to MVA.⁵ At the end of the surrender charge period, your cash surrender value will equal the full Accumulation Value.

The value of tax deferral

Interest earned on an annuity accumulates on a tax-deferred basis. You won't need to pay income taxes on your annuity until you receive a payment from your contract. If you're under age 59½ at the time of withdrawal, there may be an additional 10% IRS penalty.⁹

Minimum Guaranteed Contract Rate

You're guaranteed to receive no less than 87.5% of your premiums — less any partial withdrawals — accumulated at the Minimum Guaranteed Contract Rate (MGCR). Ask your agent/producer for this rate.

Nursing Home Waiver Rider

The Nursing Home Waiver Rider, included at no charge on your contract, can help provide you peace of mind. If you're confined to a nursing home or hospital for 90 consecutive days or more, your contract's Accumulation Value will be available without surrender charges or MVA⁵ beginning in the second contract year and during your confinement.¹⁰

Terminal Illness Rider

This no-charge rider can provide assurance that if you're diagnosed with a terminal illness, charges will be waived for a withdrawal of up to 75% of your contract's Accumulation Value.¹¹

Death benefit

If you die, the full Accumulation Value of your contract will be paid to your beneficiary(ies), without surrender charges or MVA.⁵

Free-look period

After your contract is issued, you have a specified number of days to review it; see your contract for complete details. If you're not completely satisfied with the terms, you may return the contract and receive 100% of your premiums paid, minus any prior withdrawals.

Want to learn more about MarketForce Bonus Index?

This brochure includes only a summary of the product. Availability and certain features and benefits may vary by state. Ask your agent/producer for complete contract provisions and details before purchasing.

¹For any values in the Rate Buy-Up accounts, growth must be greater than the fee for the Accumulation Value to grow. If indices decline, value in the Rate Buy-Up accounts will decline due to the fee

²Premium bonus may vary by state. CA - 7%

³The guarantees expressed in this brochure are based on the claims-paying ability of EquiTrust Life Insurance Company.

⁴Surrender of the contract may be subject to surrender charges or Market Value Adjustment. Withdrawals before age 59½ may result in a 10% IRS penalty tax. Withdrawals do not participate in index growth. In the event of a full surrender, charges will apply to any penalty-free amounts taken during the same contract year.

⁵Market Value Adjustment does not apply in CA.
